

The **Estimated Mileage Calculation Worksheet** has been established for IRP registrants that need to register with jurisdictions in which no actual mileage has been operated.

Registrants may use these estimates if they cannot determine the mileage they expect to operate.

There are two types of estimated miles:

**1<sup>st</sup> year est** – The estimating of mileage for a jurisdiction you are adding to the account and were not previously registered to operate. (Mark an “X” in the first and second column of the Mileage Registration Form.)

**2<sup>nd</sup> year est** – The estimating of mileage for a jurisdiction you were registered to operate during the reporting period and no mileage was accrued. (Mark an “X” in the first, second, and last column of the Mileage Registration Form.)

**Using the Estimated Mileage Calculation Worksheet below:**

1. Enter the **total actual fleet miles** from the Mileage Registration Form for jurisdictions you are licensing. (Actual mileages for jurisdictions that you are no longer licensing are included on the Mileage Registration Form, for auditing purposes, but are not included in the total of actual fleet miles).
2. Click on the **“Calculate Est. Miles”** button. The estimated mileage for each jurisdiction will appear.
3. Enter, onto the Mileage Registration Form, **ONLY** the estimated mileage for the jurisdiction(s) you are estimating.

**Refer to page 11 and 12 of the IRP Instruction Manual for Mileage Reporting for more information.**

## ESTIMATED MILEAGE CALCULATION

Enter total actual fleet miles from mileage registration form
